

By Grace Charity provides funding for families living in poverty enabling families to start a small business and create a livelihood.

The central objective, in addition to breaking the cycle of poverty, is to use By Grace Charity private funds to create a community where the families receiving the gift have an understanding of how to help another family.

Once a family has experienced the excitement of earning much needed income the concept is to **PASS IT ON!** Over a period of a few months, persons living in poverty are transformed into donors.

### **SMALL BUSINESS FISH FARMING**

Fish farming allows impoverished families to become self reliant in a very short period of time. Families are given basic supplies such as plastic liners, feed and "fish fry" to raise tilapia on their own land. They market the fish to provide much needed resources for their families, and assist new families in starting their own fish farms.

### **SMALL BUSINESS TAILOR SHOPS**

Women in the community receive supplies and instruction from By Grace Charity to start their own seamstress shops. This enables them to provide school uniforms and other clothing at a reduced cost to families with limited resources. These industrious women also seek out others in their community to create new businesses.

Families are encouraged to be creative in choosing businesses that adapt to their local economies. Because By Grace Charity assistance is a gift, each family agrees to assist another family.

### **SMALL BUSINESS POULTRY FARMING**

Ten qualifying families receive poultry, feed and wire mesh enclosures purchased with funds from By Grace Charity. These families, live in close proximity and have daily or weekly contact which allows them to form a village Co-Op to market the eggs and purchase supplies in bulk. They agree in advance to donate surplus chicks or layers to another qualifying family in need. The new families agree to do the same.

Through your influence and donations YOU can partner with these families to continue the CHAIN OF GIVING!
